

Summary:

- Disha is a front-end developer with hands-on experience in building responsive and scalable web applications using React.js and TypeScript.
- She is skilled in integrating RESTful APIs and managing efficient data flow using modern state management techniques.
- She is experienced in optimizing UI performance and writing clean, maintainable, and reusable component-based code.
- She is proficient in API testing and debugging using Postman, ensuring reliable backend communication.
- She is a collaborative team player with practical experience in GitHub, code reviews, and modern frontend development best practices.

Skills & Tools:

Languages	Java, JavaScript, Typescript
Web Development	React.js, HTML, CSS, SQL, Node.js, Postman, REST APIs
Version Control	Git, Github

Professional Experience:

Rivertel, Remote, USA

Apr 2025 – Nov 2025

Front-End Developer

- Developed and maintained responsive web applications using **React** and **TypeScript**, focusing on modular and scalable component design.
- Integrated **RESTful APIs** and ensured smooth **data flow** using state management techniques.
- Actively used **Postman** for **testing** and **validating API** endpoints during development.
- Collaborated via **GitHub** for version control, code reviews, and continuous integration.
- Prioritized performance optimization and clean, maintainable code following best frontend practices.

IBM, Remote, India

Jun 2024 – Aug 2024

Front-End Engineer Intern

- Developed ClimateVerse, a web application to calculate carbon footprint, AQI, and tree plantation needs, utilizing **HTML, CSS, and JavaScript** for dynamic and **responsive design**.
- Designed intuitive user interfaces using **Figma**, ensuring seamless **UI/UX workflows** and **mobile-first compatibility**.
- Implemented **real-time data processing** for accurate environmental insights, optimizing performance for faster load times and enhanced user experience.
- Collaborated remotely with a team to align objectives and deliver the project on schedule, refining problem-solving skills through debugging and code optimization.

Education:

- Bachelors in Information Technology, AKTU - 2025

Projects:

MedSync | [Github](#)

Engineered a role-based healthcare platform supporting multiple user types (patients, doctors, pharmacists, diagnostic centers) with secure onboarding and interaction workflows. Integrated OTP-based authentication and optimized state management using Context API for efficient data flow.

Tech Stack: React.js, React Router, Tailwind CSS, JavaScript, Context API

Portfolio Website | [Live URL](#)

Designed and developed a responsive portfolio website to showcase projects and skills, ensuring cross-browser compatibility, optimized performance, and improved visibility through SEO best practices.

Tech Stack Used: HTML, CSS, JavaScript.

Climate Verse | [Live URL](#)

ClimateVerse is a web application that calculates carbon footprint, tracks AQI, and recommends tree plantation needs based on user data such as energy consumption and travel habits. It leverages real-time environmental data through APIs to offer personalized eco-friendly insights.

Tech Stack Used: HTML, CSS, JavaScript, Figma.
